

MEMORANDUM

Kissimmee Police Department

DATE: December 10, 2019
TO: Chief Jeffrey O'Dell, Chief of Police
VIA: Chain of Command
FROM: Supervisor Jennifer Helms, Support Services Division
SUBJECT: After Action Report of the Evidence Vault Flood

On Monday, July 22, 2019, the air conditioning unit on the second floor of the Police Department became clogged and subsequently resulted in a flood. This occurred directly above the evidence vault. The water seeped through the ceiling and onto multiple items of evidence. During the day of July 22, 2019, there were no evidence technicians working therefore the water damage was not identified until July 23, 2019.

The evidence vault was analyzed for water damage and several roofing tiles were observed with water damage, while others had completely collapsed from the ceiling. Several evidence bins were found to contain pieces of ceiling tile as well as water. The City of Kissimmee Maintenance assisted with the use of a shop-vac to collect any standing water within the vault and evidence items were removed from the vault into other areas of the department in order to commence the drying process. The areas of the department utilized during the drying process consisted of the Forensic Unit main office area, Forensic Unit Laboratory, the Forensic Unit Garage, the Upstairs Evidence Vault, and an upstairs utility room adjacent to the Upstairs Evidence Vault.

Individuals that assisted with the drying/repackaging process include the following KPD personnel:

Veronika Rivera #808, Pamela Koski #516, Isabel Johnson #500, Michelle Monroe #670, Emily Kaluszkina #769, Milagros Sanchez #830, Rondu Artis #755, Anthony Johnson #726, Corina Garcia #847, Scott Bowman #416, Raquel Fernandez #391, Craig Putriment #302, and myself.

Upon drying the items, several items were found to have damaged packaging. Repackaging of the items was accomplished by packaging the item and the original packaging into new, unused packaging. The drying and repackaging of items concluded on Thursday, August 8, 2019.

A case number was generated to document the incident via a case report under 19-007224. The case report and a complete list of all items affected will be attached as an enclosure with this memorandum. The Records Unit will include a copy of the case report for 19-007224 to each case file that was impacted. A total of approximately 6,654 items were affected. It is unknown whether these items have been subject to permanent water damage and/or cross-contamination, and it is recommended, these items be reviewed prior to use in any court proceedings.

The State Attorney's Office along with the City of Kissimmee Legal Counsel was notified of the incident. Members of the State Attorney's Office, Danielle Pinnell and Crystal Allen, and the City of Kissimmee Legal Counsel, Celia Thacker Dorn, attended a meeting with Captain Tambasco and me on Thursday, August 23, 2019, to further discuss and physically witness the area affected. The State Attorney's Office was understanding of the unforeseen occurrence, and was concerned with the number of cases that may have been permanently impacted. It was advised that cases for trial should be reviewed should it have been a case impacted by this incident.

In an effort to mitigate any further incidents such as this one, an automatic shut off float was installed in the drain of the air conditioning unit along with an automatic emergency pump. Research is being conducted to ascertain a bladder that can be installed in the ceiling to catch water and redirect it to a drain and possibly purchasing a server to store all of the digital evidence. 400 new water proof evidence storage bins were purchased and implemented to protect the evidence.

On Thursday, August 22, 2019, Evidence Technician Rivera and I observed a discolored ceiling tile after the original incident documented by case number 19-007224. City of Kissimmee Building Maintenance responded to assess the situation and observed that the installed automatic shut off float on the air conditioning unit was not functioning properly. An evidence bin located under the discolored ceiling tile contained water and items within the bin were subject to potential water damage.

The bin with water damage was removed from the Main Evidence Vault and placed within the Forensic Unit Garage in order to commence the drying process. Crime Scene Technicians Isabel Johnson, Pamela Koski, and Michelle Monroe assisted with the drying process.

Upon drying the items, several items were found to have the presence of possible mold. Repackaging of the items was accomplished by packaging the item and the original packaging into new, unused packaging. The drying and repackaging of items concluded on Thursday, August 29, 2019.

An additional case number was generated to document the incident via a case report under 19-007707. The case report and a complete list of affected items will

be attached as an enclosure to this memorandum. The Records Unit will include a copy of the case report for 19-007707 to each case file that was impacted. A total of approximately 144 items were affected. It is unknown whether these items have been subject to permanent water damage and/or cross-contamination, and it is recommended, these items be reviewed prior to use in any court proceedings.

During November 2019, a further review of the 6,798 total items affected by the flood (6,654 items – case report 19007224; 144 items – case report 19007707) was completed. KPD cases impacted by the flood include 67 cases that are actively being pursued by the State Attorney's Office. These cases range from 2014 – 2019. A complete list of the active cases will be attached to this memorandum.

Captain Layne made contact with Crystal Allen at the State Attorney's Office, and the list of involved cases will be forwarded to her at her request. As the assigned attorneys wish to review the involved evidence, the Evidence Unit will work directly with them to facilitate any requests.

Active SAO Cases Impacted by KPD Evidence Flood

Court Case Number	Case Type	Defendant(s)	KPD Case Number	Status	Disposition

Incident / Investigation - Case #: 19-007224 : Off. Narr

On Tuesday, 23 July 2019, at approximately 0755 hours, Crime Scene Technician (CST) Pamela Koski, #516, advised by phone that standing water was observed on the floor of the Kissimmee Police Department (KPD) Main Evidence Vault by Evidence Technician Veronika Rivera, #808.

The vault was further analyzed for water damage and several roofing tiles were observed with water damage, while others had completely collapsed from the ceiling. Several evidence bins were found to contain pieces of ceiling tile as well as water. The City of Kissimmee Maintenance assisted with the use of a shop-vac to collect any standing water within the vault and evidence items were removed from the vault into other areas of the department in order to commence the drying process. The areas of the department utilized during the drying process consisted of the Forensic Unit main office area, Forensic Unit Laboratory, the Forensic Unit Garage, the Upstairs Evidence Vault, and an upstairs utility room adjacent to the Upstairs Evidence Vault.

Individuals that assisted with the drying/repackaging process include me and the following KPD personnel:

Veronika Rivera #808
Pamela Koski #516
Isabel Johnson #500
Michelle Monroe #670
Emily Kaluszkina #769
Milagros Sanchez #830
Rendu Artis #755
Anthony Johnson #726
Corina Garcia #847
Scott Bowman #416
Raquel Fernandez #391
Craig Putriment #302

Upon drying the items, several items were found to have damaged packaging. Repackaging of the items was accomplished by packaging the item and the original packaging into new, unused packaging. The drying and repackaging of items concluded on Thursday, August 8, 2019.

Complete lists of all items affected will be attached as an enclosure with this report. A total of approximately 6,654 items were affected. It is unknown whether these items have been subject to permanent water damage and/or cross-contamination, and it is recommended, these items be reviewed prior to use in any court proceedings.

MFR Officer Narrative: 19007707 (KPD)

On Thursday, August 22, 2019, at approximately 1550 hours, Evidence Technician Veronika Rivera, ID 808, and I observed discoloration in a ceiling tile within the Main Evidence Vault. The evidence bin underneath the discolored ceiling tile contained water and items within the bin were subject to potential water damage.

This incident was reported to Support Services Captain Jeffrey Tambasco, ID 285, at approximately 1554 hours. The City of Kissimmee Building Maintenance responded to the Police Department to check the area for leaking water and advised there appeared to be an issue with the air conditioning unit.

The bin with water damage was removed from the Main Evidence Vault and placed within the Forensic Unit Garage in order to commence the drying process. Crime Scene Technicians Isabel Johnson, ID 500, Pamela Koski, ID 516, and Michelle Monroe, ID 670, assisted with the drying process.

Upon drying the items, several items were found to have the presence of possible mold. Repackaging of the items was accomplished by packaging the item and the original packaging into new, unused packaging. The drying and repackaging of items concluded on Thursday, August 29, 2019.

A complete list of all items affected will be attached as an enclosure to this report. A total of approximately 144 items were affected. It is unknown whether these items have been subject to permanent water damage and/or cross-contamination, and it is recommended, these items be reviewed prior to their use in any court proceedings.
